WORK EXPERIENCE

Software Engineer
Google

07/2024 - Present *Bengaluru, India*

Google Cloud, Technical Infrastructure, Optima Health Manager

- Own e2e delivery of resource management service, boosting allocation and system performance. Optimized components to improve reliability, reducing system load by **80%** and latency from **15s to 4ms**

Software Engineer
Nference

10/2022 - 05/2024 *Bengaluru, India*

- **Engineered Scalable Healthcare Data Platform:** Developed and led UI/API features (models-mgmt, cost-configs, dashboard) for Workspaces (Go/Django/MySQL), facilitating direct access and analysis of **12M+ patient EMRs** and managing **100+ daily workspaces** across **10+ active environments** (GKE)
- **Optimized Performance & Resource Utilization:** Reduced disk usage by **75%** and eliminated in-memory buffering through custom parsers and concurrent streaming I/O. Decreased container image size by **30%** and startup time from 8 to **5 minutes**
- **DevOps & Observability:** Managed containerized services (Docker/GKE) and implemented robust monitoring and inspection (logs, metrics, network) across containers, machines, and storage volumes

Associate Software Engineer
PlaySimple Games

02/2022 - 09/2022 *Bengaluru, India*

- Developed and scaled Jigsaw (Flutter) to **100k+** downloads. Improved app launch performance by reducing startup time from 8+ seconds to 3 seconds via multi-threading

Backend Developer
Viga Entertainment Technology

03/2020 - 12/2020 *Remote/Bengaluru*

- Designed a MERN-stack Movie Asset Management database and APIs; led development of a Movie Collaboration platform (supporting 3 movie projects)
- Developed SSO (Django) serving 10+ internal services , and managed deployment via CI/CD to Google Cloud Run

EDUCATION

Computer Science and Engineering (Dual B.Tech. & M.Tech.)
Jaypee Institute of Information Technology

08/2017 - 05/2022 *Noida*

SKILLS

Python | Go | SQL | Docker | Kubernetes | GCP | AWS | Azure | NodeJS | Django

OPEN SOURCE

Contributions to Encode

Primarily contributed to uvicorn, a lightning-fast ASGI server implementation [Major: #1026 - HTTP/2 Implementation]

PERSONAL PROJECTS

Hedwig, the Messenger (2021)
- Developed an asynchronous web-server plugin for chat applications with multiple rooms and participants
- Built using FastAPI, websockets, MongoDB for storage, and Redis Pub/Sub for message queueing and caching

Binge-o-Philia - Cinephiles' Social Network (2020)
- Developed a full-fledged social networking platform tailored for movie enthusiasts, facilitating connection, updates, and efficient time and data management
- A cross-platform app developed in React-Native powered by Django-based back-end (PostgreSQL and AWS for data storage)

Ministry of Statistics and Programme Implementation (MOSPI) - Website (2019)
- Developed a Django-powered website for MOSPI, automating data processing, analysis, and reporting from Excel sheets to streamline workflow and boost efficiency, which achieved 1st Runner-up at Smart India Hackathon 2019 in Guwahati, Assam

TALKS AND ACHIEVEMENTS

Speaker | PyCon Australia 2021
Delivered talk on web-servers ecosystem at the PyCon AU

Speaker | PyCon India, PyCon Sweden 2020
Delivered talks on "Developing a Single-Sign-On Service using Django" at the Python Conference India and Sweden

GCP Quest Leader | Qwiklabs (07/2019 - 06/2020)
Delivered a talk on GCP and hosted Cloud Study Jam at GDG JIIT, Noida, drawing 300+ students from Delhi-NCR

ORGANIZATIONS

Google Developer Group, JIIT (08/2018 - 05/2021)
Technical Coordinator - workshops, conferences and hackathons

INTERESTS

Software Packaging | Documenting | Mentoring
